

Community Council meeting Sept 8<sup>th</sup> 2017  
Room 218 @ 11:45

Motion to nominate Paul as chair, Heather co-chair and Jennie secretary  
All in favor all I's said yes

We will meet 2<sup>nd</sup> Friday of the month unless it conflicts with holidays, etc..

School committee calendar Lunch assignments;

Oct 13<sup>th</sup> – Alicia Tripp and DeAnna Perry

Nov 10<sup>th</sup> – Jennie Blum & Sara Ashby

Dec 8<sup>th</sup> - NO CC this month, unless needed. Will work out lunch if needed.

Jan 12<sup>th</sup> Nicki Collins, Lisa Hart

Feb 9<sup>th</sup> Heather Belnap- Jensen & Pam Smalley

March 9<sup>th</sup> Paul Caldaralla & Anthony Bates

April 13<sup>th</sup> (IF needed) – Mike and Rene

Thank you Rene and Mike for lunch today : )

We have gone from three to two teacher reps on the CC because it's hard to fill classes during the school day. We are still in compliance.

Safety report by Sarah Ashby:

There are concerns with the holes in fence on the back field (City will be closing those as part of final construction efforts, park areas unable to be supervised due to limited resources, and the pedestrians walking through the campus. The solution is forth coming; the city will donate the use of some land for students to play on, this will happen after construction is done. The city will plan a time for us to do a walk around and assess where the fence needs to be and what land they are donating as use of part of our campus. Sarah said the city will contact on Monday Sept 11<sup>th</sup>.

Boundary lines:

So far it looks like it will cut from tennis court from west edge of the school. The park that is north of the tennis court is the city property, but may become the part that is donated to us. On the nice grassy area we may get soccer goals. Once we figure out what the city is going to decide then we can re-evaluate what equipment we want on that field. There is a concern that we have a lack of grass for the lower grade students.

The new drainage area south of the school is all ours the district will mow it and maintain it. We are putting a couple of trees on the West fence line by the apartments as a barrier.

Also a safety concern is the utility lane on the north side of the school. We are considering having that closed off to public access.

As far as carpool issues we need to remind parents to not drop off students on the West side of school where there is no supervision there.

There will be a flagger South of the park by the construction to help keep students safe while construction is still going on.

Sage Report:

Look at the Wasatch Proficiency Movement Document. It will be emailed out.

Mike and Rene will be looking at the Data and helping teachers address areas where more support is needed.

MTSS – Spire, 95% which consists of Phonics lessons and Phonological awareness Lessons, Wonder Works, Wonders and enrichment groups.

School grades: State changed the levels and grades, the State is taking a year off from school grades.

The MTSS model is designed to fill the reading gaps.

Students are losing math facts from grade to grade. We are doing some clubs to help students in the math fact area. For math enrichment we have advanced math classes in grades 4-6.

Wasatch has 17% absenteeism. This is a concern. We are looking at the data and are working to have some rewards for good attendance. We will have rewards for students each month no tardiest and no absences.

Agenda Items for next time:

Rene will email the Proficiency Movement Document and send a summary of what this information on the document means, and we will plan on continuing conversation around our school plan.

Read through the document and come to our next meeting with thoughts and ideas.

Email any agenda items to Paul Caldarella: paul\_caldarella@byu.edu.
